

## One For Your Smart Home Control

Enjoy 8 configurable smart home actions with your new ELDES KeyBoB. It has never been so easy before. Control the lights, temperature or grass watering system at home, open or close garage doors, blinds or gates. For your and your family safety, use KeyBoB as a panic button with the exclusive - 1.7 km wireless distance. Empower your imagination and control any function of your smart home depending on your needs.

## Be Different. Express Your Uniqueness

The new KeyBoB comes in 3 different colors, which were accurately chosen considering the newest color trends by [Pantone](#) (a global authority on color and provider of professional color standards for the design industries). Choose the classic black for yourself and comfort your kids or other family members by offering them their key fob in mint or coral. Let every family member feel unique. Make security colorful and stylish.

## The Champion in 1.7 Km

---

KeyBoB pushes the boundaries of how far your key fob can work. Exclusive and innovative wireless communication technology allows you to reach up to 1.7 kilometers in open areas. You will be able to control your object for long distance, even if you are separated by thick internal walls or multiple-store properties. Do not worry while you are gardening in the backyard or cutting the grass near the sauna house or swimming pool. Open the gates remotely for your guests with a single button click. Your comfort and peace-of-mind is the highest priority for us, that is why we have created KeyBoB – to make you feel at ease about your home.

## **LTC: A Revolutionary New Technology for The Lifetime Battery**

Being innovators in the security market for more than 16 years, we are always seeking to be one step forward. Today we present a revolutionary LTC (Lifetime charge) technology, which provides an unprecedented leap in battery life. Have you ever had a device which worked for 10 years or even more? You have never even dreamed about it and our engineers already made it real. LTC technology employs the usage of battery exclusively on the exact button press and completely turns off the battery usage when the key fob is not active. Welcome KeyBoB, the first key fob, manufactured with ELDES LTC technology.
